R. DE SOCARRAS,
Acting Assistant Surgeon, U. S. M. H. S.

EGYPT.

Report of typhus fever in Alexandria.

BERLIN, November 6, 1900.

SIR: I have the honor to submit the following report obtained from the imperial health office of the cases of typhus fever occurring at Alexandria, Egypt, during the present year:

The slight epidemic of typhus fever occurred among the 600 inmates of the Government prison. Between April 16 and June 1 there occurred 27 cases, of which 4 resulted fatally. On January 18 there occurred a fatal case in the city, and between April 16 and August there occurred 16 deaths in the city. As only 23 cases of sickness were reported, it is evident that a number of cases never come under medical or official notice. The cases were confined practically to the lower classes. It was likely brought into Jerusalem by pilgrims from the East, or was brought in from southern Russia or the Balkan country (Roumania, Servia, or Montenegro).

According to reports from the physicians the symptoms were often very similar to the pulmonic type of plague.

Respectfully,

JOSEPH B. GREENE,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*
